2015/2016 Winter Season 1st Trip field trip launched on 9th Jan

The main hope of this trip was to try to see if a Wallcreeper could be found in the environs of St Hilarion Castle – On 9th January a small ‘but perfectly formed’ group of birders went in search of a Wallcreeper. In past years there have been reports in and around the castles walls and rocks. Thanks to the Ministry of Tourism we had secured pre-arranged free entry in the afternoon for our members to hunt for this bird - as a positive sighting could be good for tourism.

Hamitköy Reservoir
This was a new location for many of the group, where we were able to have lunch and chat about the day so far whilst enjoying the sunshine. We didn’t check the back end just near the barrage but there were disappointingly low numbers of birds on the water - Coot few, Little Grebe few, Goldfinch

St Hilarion Castle in search of a Wallcreeper
Black redstart ~10, Robin, Great tit ~10, Kestrel 4, Rock Dove, Blackbird 2, Rock Bunting ~15, Sardinian Warbler, Cyprus Warbler (heard)

Well we didn’t get a positive sighting of a Wallcreeper even though Gavin is convinced he did spot one glide past above the focus of our attention - we were all excitedly concentrating on the group of Rock buntings below us as we looked over the lower castle walls. Nevertheless - we set off down the narrow path by the Castle shop (LHS) to go anti-clockwise around on a goat track around the outside in search of the bird but saw only better views of the Rock Bunting…. A mystery yet to be resolved…. Stay tuned!
